CHERRY HOME SHORES A

CHERRY HOME SHORES FALL 2004

PRESIDENT'S CORNER

We have had a cool, but busy summer. One of the highlights of the summer was the Pig Roast on the 4th of July weekend. Many thanks to Wendie Jacobson for organizing the event again. Elsewhere in the newsletter you will see the cost summary of the event, which cost less this year because of the fee charged. For the most part we had fewer complaints about noise and fireworks this summer than in the past. Perhaps it was the cool weather. We did have a problem with people stealing our signs. Both the "permanent" signs at the South Park and the Clubhouse as well as the temporary "no fireworks" signs at the 4th of July weekend. The "permanent" signs are important because they convey information about the use of the parks, which has changed recently. Parks are now closed at 11 PM and except for the Clubhouse Park, fires are not permitted in the parks. If we learn who stole the signs we will prosecute them.

Webb Site (www.cherryhomeshores.com)

This summer we began a more vigorous use of the web site. Lynn Livingston took over as the web master and has worked hard to create an attractive and useful site. Its eventual success will depend on how well everyone uses it and populates the site with useful information. It is our intent to have current and pertinent information at that site. It has already proved useful for members to share ideas and opinions with the board. Member's comments and suggestions for the site are most welcome. I hope in the future that we will be able to communicate more things via email and the web site.

Road

Our road has been resurfaced. I was gone in September so missed the dust and the fruit flies. (good planning) A few of the big dips were improved and it was good to get it sealed to prevent further pothole degradation.

Architecture Committee

Building in the association continues at a good pace. We need to look at tree cutting plans before the trees are cut. Several projects in the past couple of years have cut an excessive number of trees and we would like to consult on the removal plan BEFORE it is undertaken. Neil Barnett (386-5797) has joined me on the committee and when one of us is not available the other can be contacted.

Safety

Many thanks to Kristine Irvine for working with the Sheriff's department to eventually get an appropriate speed limit established in Cherry Home Shores. It is not done yet, but progress has been made. Congratulations to Kristine on the birth of a son in August.
